

# Course Catalogue Engineering and ICT

EXCHANGE PROGRAMME

Games Programming 2025-2026

*University of  
Applied Sciences*

**Windesheim**

Course summary	
VOE Code: ICT.KS.INT	ECTS credits: 1 Level: Bachelor's degree (full-time)
<b>Course Title</b>	International Course
<b>Type</b>	Optional
<b>Learning competences</b>	
<b>Learning outcomes</b>	The student can give a presentation of 30 minutes for a mixed audience about the differences in (inter)cultural aspects between The Netherlands and their home country.
<b>Course content</b>	<p>Content of the presentation shows aspects that vary from food and habits to teaching and/or working in a company. Some theoretical aspects need to be included, like the dimensions of Hofstede (country comparison) or the ones from Hall. It can start with a general introduction of the country itself.</p> <p>The 30 minutes consist of 20 minutes presentation and 10 minutes Q and A with the audience.</p>
<b>Planned learning activities and teaching methods</b>	Presentation for audience
<b>Recommended or required reading and other learning resources / tools</b>	<ul style="list-style-type: none"> <li>• Student's laptop.</li> <li>• Big monitor/screen in the room.</li> </ul>
<b>Prerequisites and co-requisites</b>	You are required to have two years of Bachelor's study experience and English-language skills at B2 level.
<b>Level</b>	Advanced
<b>Grading scale</b>	1 up to 10, 1 dec.
<b>Assessment methods and criteria</b>	Pass or fail
<b>Language of Instruction</b>	English
<b>Name of lecturer</b>	For information about the lecturers you can contact Matthieu van Bekkum
<b>Mode of delivery</b>	Face to face

Course summary	
VOE Code: ICT.GP.PRJCT.V22	ECTS credits: 10 Level: Bachelor's degree (full-time)
<b>Course Title</b>	Project Games Programming
<b>Type</b>	Compulsory
<b>Learning competences</b>	
<b>Learning outcomes</b>	You will create a (serious) game in a small group of fellow students.
<b>Course content</b>	<p>You will have the option to choose between:</p> <ul style="list-style-type: none"> <li>• Designing and implementing your own game.</li> <li>• Creating a (serious) game for a real client.</li> <li>• Doing research into new technology and building a prototype game demonstrating the capabilities.</li> <li>• ..</li> </ul> <p>The project has to meet a number of criteria, and will be approved or disapproved by a lecturer. The project requires the use of challenging technology.</p>
<b>Planned learning activities and teaching methods</b>	See Electronic Learning Environment
<b>Recommended or required reading</b>	<ul style="list-style-type: none"> <li>• Working in a project group</li> <li>• Workshops</li> </ul>

<b>and other learning resources / tools</b>			
<b>Prerequisites and co-requisites</b>	You are required to have English-language skills at B2 level and at least 120 ECTS credits in Computer Science or Software Engineering. Experience in C# and/or Java, algorithms and data structures, OO design and programming, UML and design patterns and software engineering practices is also necessary. When you apply for this programme, we will check if your current skills and knowledge match the requirements.		
<b>Level</b>	Advanced		
<b>Grading scale</b>	1 up to 10, 1 dec.		
<b>Assessment methods and criteria</b>	<b>Type of assessment</b>	<b>Grade weighting</b>	<b>Criteria</b>
	Assessment	1	Higher or equal to 5.5
<b>Language of Instruction</b>	English		
<b>Name of lecturer</b>	For information about the lecturers you can contact Matthieu van Bekkum		
<b>Mode of delivery</b>	Face to face		

Course summary			
VOE Code: ICT.GP.AAI.V22		ECTS credits: 6	Level: Bachelor's degree (full-time)
<b>Course Title</b>	Algorithms and Artificial Intelligence for games		
<b>Type</b>	Compulsory		
<b>Learning competences</b>			
<b>Learning outcomes</b>	During this course students will learn about algorithms specifically for games and how to apply various artificial intelligence techniques to create intelligent computer players.		
<b>Course content</b>	Some of the topics that will be covered are: <ul style="list-style-type: none"> <li>• Generating and Solving Mazes</li> <li>• Backtracking Techniques</li> <li>• Minimax algorithm and Alfa-Beta Pruning</li> <li>• Path Planning</li> <li>• Steering Behaviours</li> <li>• State Machines</li> <li>• Goal-driven Behaviours</li> <li>• Fuzzy Logic</li> </ul>		
<b>Planned learning activities and teaching methods</b>	<ul style="list-style-type: none"> <li>• Lectures</li> <li>• Labs</li> <li>• Assignments</li> </ul>		
<b>Recommended or required reading and other learning resources / tools</b>	See: Electronic Learning Environment		
<b>Prerequisites and co-requisites</b>	You are required to have English-language skills at B2 level and at least 120 ECTS credits in Computer Science or Software Engineering. Experience in C# and/or Java, algorithms and data structures, OO design and programming, UML and design patterns and software engineering practices is also necessary. When you apply for this programme, we will check if your current skills and knowledge match the requirements.		
<b>Level</b>	Advanced		
<b>Grading scale</b>	1 up to 10, 1 dec.		
<b>Assessment methods and criteria</b>	<b>Type of assessment</b>	<b>Grade weighting</b>	<b>Criteria</b>
	Assignment	2	Higher or equal to 5.5
	Theory exam	1	Higher or equal to 5.5
<b>Language of Instruction</b>	English		
<b>Name of lecturer</b>	For information about the lecturers you can contact Matthieu van Bekkum		
<b>Mode of delivery</b>	Face to face		

Course summary			
VOE Code: ICT.GP.CG.V22		ECTS credits: 5	Level: Bachelor's degree (full-time)
<b>Course Title</b>	Computer Graphics		
<b>Type</b>	Compulsory		
<b>Learning competences</b>			
<b>Learning outcomes</b>	Almost every game is played in a graphical two- or three-dimensional space. In this course you will learn how to create these environments. The theoretical basis will be covered, as well as practical implementation using OpenGL and other libraries. With the help of these libraries you can manipulate objects in space and change their look and feel with respect to the material the object is made of.		
<b>Course content</b>	Topics: <ul style="list-style-type: none"> <li>• Shaders</li> <li>• Transformations</li> <li>• Texture Mapping</li> <li>• 3D Modeling</li> <li>• Theoretical and mathematical background</li> <li>• CPU vs GPU</li> </ul>		
<b>Planned learning activities and teaching methods</b>	<ul style="list-style-type: none"> <li>• Lectures and labs (combined)</li> <li>• Assignments in pairs</li> </ul>		
<b>Recommended or required reading and other learning resources / tools</b>	See Electronic Learning Environment.		
<b>Prerequisites and co-requisites</b>	You are required to have English-language skills at B2 level and at least 120 ECTS credits in Computer Science or Software Engineering. Experience in C# and/or Java, algorithms and data structures, OO design and programming, UML and design patterns and software engineering practices is also necessary. When you apply for this programme, we will check if your current skills and knowledge match the requirements.		
<b>Level</b>	Advanced		
<b>Grading scale</b>	1 up to 10, 1 dec.		
<b>Assessment methods and criteria</b>	<b>Type of assessment</b>	<b>Grade weighting</b>	<b>Criteria</b>
	Final assignment	5	Higher or equal to 5.5
	Homework 1	2.5	Higher or equal to 5.5
	Homework 2	2.5	Higher or equal to 5.5
<b>Language of Instruction</b>	English		
<b>Name of lecturer</b>	For information about the lecturers you can contact Matthieu van Bekkum		
<b>Mode of delivery</b>	Face to face		

Course summary			
VOE Code: ICT.GP.CPP.V22		ECTS credits: 3	Level: Bachelor's degree (full-time)
<b>Course Title</b>	Programming in C++		
<b>Type</b>	Compulsory		
<b>Learning competences</b>			
<b>Learning outcomes</b>	Nowadays the game industry mostly works with sophisticated game engines, like the CryEngine or the Unreal Engine. To add functionality to the Unreal Engine, you have to program in C++. C++ is a widely-used programming language that is used in the gaming industry as well as in many other industries. C++ is different from programming languages		

	like Java or C#, mainly because you are responsible for your own memory management. You will learn C++ Programming in a Windows environment.		
<b>Course content</b>	<ul style="list-style-type: none"> <li>• Introduction C++</li> <li>• Classes in C++</li> <li>• Object orientation in C++</li> <li>• Templates</li> <li>• STL Classes (IO streams, vectors, etc.)</li> <li>• Pointers &amp; references</li> <li>• Usage of C++ in a Windows environment</li> </ul>		
<b>Planned learning activities and teaching methods</b>	<ul style="list-style-type: none"> <li>• Lectures</li> <li>• Labs</li> <li>• Assignments</li> </ul>		
<b>Recommended or required reading and other learning resources / tools</b>	<ul style="list-style-type: none"> <li>• Visual Studio 2015</li> <li>• See "Electronic Learning Environment" (ELO)</li> </ul>		
<b>Prerequisites and co-requisites</b>	You are required to have English-language skills at B2 level and at least 120 ECTS credits in Computer Science or Software Engineering. Experience in C# and/or Java, algorithms and data structures, OO design and programming, UML and design patterns and software engineering practices is also necessary. When you apply for this programme, we will check if your current skills and knowledge match the requirements.		
<b>Level</b>	Advanced		
<b>Grading scale</b>	1 up to 10, 1 dec.		
<b>Assessment methods and criteria</b>	<b>Type of assessment</b>	<b>Grade weighting</b>	<b>Criteria</b>
	Lab exam	1	Higher or equal to 5.5
<b>Language of Instruction</b>	English		
<b>Name of lecturer</b>	For information about the lecturers you can contact Matthieu van Bekkum		
<b>Mode of delivery</b>	Face to face
